

## ABSTRAK

Nama : Anisa Aulia Rahmah  
Fakultas : Kedokteran Gigi  
Judul : Tingkat pengetahuan terhadap protokol pencegahan COVID-19 pada siswa SMA Nurul Fikri Boarding School di Serang Banten

**Latar Belakang:** COVID-19 adalah penyakit menular sangat cepat yang berasal dari percikan (droplets) seperti mulut, hidung penderita saat batuk, bersin. Hal ini sungguh meresahkan dan menimbulkan ketakutan pada masyarakat. Penyakit ini hingga kini belum ada obat untuk menyembuhkannya. Salah satu cara memutuskan rantai penyebaran penyakit ini yaitu pengetahuan masyarakat terhadap protokol pencegahan COVID-19. **Tujuan:** Untuk mengetahui tingkat pengetahuan terhadap protokol pencegahan COVID-19 pada siswa SMA Nurul Fikri Boarding School di Serang Banten dan tinjauannya dari perspektif Islam. **Metode Penelitian:** Jenis penelitian ini adalah analitik dengan desain penelitian cross sectional. Jumlah responden pada penelitian ini adalah 163 responden dengan menggunakan metode random sampling. Pengambilan data dilakukan secara daring melalui *googleform* dan analisis data dilakukan dengan perangkat lunak SPSS . **Hasil:** siswa SMA Nurul Fikri Boarding School yang mengetahui protokol pencegahan COVID-19 yaitu sebesar lebih dari 80% untuk kelas 3 SMA dengan pengetahuan tinggi 65 cukup 12 rendah 0, diikuti kelas 2 SMA dengan pengetahuan tinggi 48 cukup 4 rendah 0, dan kelas 1 SMA tinggi 21, cukup 11, rendah 2. **Kesimpulan:** sebanyak 80% siswa SMA Nurul Fikri Boarding School telah mengetahui protokol pencegahan COVID-19. Pemutusan mata rantai penyebaran pada COVID-19 ini memerlukan pengetahuan terhadap protokol pencegahan COVID-19. Islam memandang penting ilmu pengetahuan. Peraturan yang ditetapkan oleh pemerintah merupakan bentuk implementasi dari *maqashid syariah* dalam ikhtiar menekan laju penyebaran COVID-19.

**Kata kunci:** COVID-19, pengetahuan, protokol pencegahan.

Title : The level of knowledge of the protocol prevention of COVID-19 in high school students of Nurul Fikri Boarding School in Serang Banten

**Introduction:** Covid-19 is a very fast infectious disease that originates from droplets such as the patient's mouth, nose when coughing, sneezing. This matter really unsettling and cause fear in the community. This disease until now there is no medicine to cure it. One way to decide the chain of spread of this disease, namely the public's knowledge of the protocol Covid-19 prevention. Before the Covid 19 outbreak appeared during the time of the Prophet Muhammad there has been an outbreak of *tha'un*, an infectious disease that can kill many humans in an area. The regulations set by the government are the form of implementation of *maqashid sharia* in an effort to reduce the rate of spread COVID-19. **Aim:** To determine the level of knowledge of the protocol prevention of COVID-19 in high school students of Nurul Fikri Boarding School in Serang Banten and its overview from an Islamic perspective. **Research Methods:** This type of research. This is an analytic study with a cross sectional design. Number of respondents on this study was 163 respondents using the random sampling method. Data retrieval is done online via google form and data analysis was performed using SPSS software. **Result:** High school students of Nurul Fikri Boarding School who knows the COVID-19 prevention protocol, namely amounting to more than 80% for grade 3 SMA with high knowledge 65 middle 12 low 0, followed by grade 2 SMA with high knowledge 48 middle 4 low 0, and grade 1 SMA high 21, middle 11, low 2. **Conclusion:** as many as 80% of students High school of Nurul Fikri Boarding School has known the COVID19 prevention protocol. Breaking the chain of spread of COVID-19 requires knowledge of the COVID-19 prevention protocol. Islam views science as important. The regulations set by the government are a form of implementation of *maqashid sharia* in an effort to reduce the rate of spread of COVID-19.

**Keywords:** Covid-19, knowledge, protocols preventive.
