"PENGARUH FAKTOR FUNDAMENTAL DAN KINERJA KEUANGAN TERHADAP PRICE EARNING RATIO EMITEN NON FINANSIAL DI BURSA EFEK INDONESIA SERTA TINJAUAN ISLAM"

Abstract

This purpose of study are about the effects of fundamental factor (price to book value) financial performances (total asset turnover and return on equity) on price earning ratio with source data used in this study is that financial ratio published by Indonesian Stock Exchange (IDX). The analysis focused on the 2006-2010 period to see influence of fundamental factor (price to book value) financial performances (total asset turnover and return on equity) towards price earning ratio in non-financial stock at Bursa Efek Indonesia (BEI). The method used is descriptive quantitative method of analysis and multiple linear regression analysis to measure the effect of independent and dependent variables mentioned above in the previous sentence. The findings indicate that variable fundamental factor (price to book value), financial performances (total asset turnover, return on equity) and a variable ~~effector~~ price earning ratio are significant. The ~~conclusion~~ of this research is fundamental factor and financial performances have positive effect on price earning ratio. This research will look at the view of ~~islam~~-related financial information and use of stock as an investment instrument. The financial information presented in accordance with Islamic teachings and the use of stocks not related to an unlawful business.

Keywords : Fundamental Factor, Financial Performances, Price Earning Ratio
