***A Comparative Analysis between Islamic and Conventional Commercial Banks
and Their Reviews According to an Islamic Perspective***

ABSTRACT

The purpose of this study is to determine the comparison of the Financial Performance of Islamic Commercial Banks and Conventional Commercial Banks. The population in this study are Islamic Commercial Banks and Conventional Commercial Banks in Indonesia. The sampling technique used was the Side Judgment and purposive sampling technique. The sample size in this study were banks in Indonesia which were categorized in book one. Data is collected based on data from the Financial Services Authority (OJK) and Bank Indonesia (BI). The data analysis method used is the comparative method and is tested by the Sample T Test method. The results showed that: (1) There is no significant difference between the FDR / LDR ratio of Islamic Commercial Banks and Conventional Commercial Banks. (2) There is a significant difference between the ROA ratio of Islamic Commercial Banks and Conventional Commercial Banks. (3) There is a significant difference between the BOPO ratio of Islamic Commercial Banks and Conventional Commercial Banks. (4) There is a significant difference between the CAR ratio of Islamic Commercial Banks and Conventional Commercial Banks.

From an Islamic point of view, there is a significant difference between the Financial Performance of Islamic Commercial Banks and Conventional Commercial Banks. This is because basically Conventional Commercial Banks use different principles and systems from Islamic Commercial Banks in carrying out their business activities. In carrying out their activities, Conventional Commercial Banks provide broad freedom in carrying out their financial activities, while Islamic Commercial Banks use systems and principles that are in accordance with Islamic teachings and do not apply things that are prohibited in Islam which can harm many parties.
