

ABSTRAK

Nama : Laras Fajri Nanda Widiiswa
Program Studi : Kedokteran Gigi Program Sarjana
Judul : Gambaran Perilaku Ibu dalam Menyikat Gigi Anak di BIMBA
Rainbow Kids Cipinang Muara Jakarta Timur

Latar Belakang: Anak usia 3-4 tahun belum mampu secara optimal dalam membersihkan gigi secara mandiri disebabkan karena perkembangan motorik halus anak usia 3-4 tahun belum sempurna. Hasil RISKESDAS 2018 menunjukan perilaku menyikat gigi yang benar untuk usia balita masih sangat rendah sehingga orang tua terutama Ibu harus berperan aktif dalam membantu menyikat gigi anaknya setiap hari agar terhindar dari kerusakan gigi. **Tujuan:** Mengetahui gambaran perilaku Ibu dalam menyikat gigi anak di BIMBA *Rainbow Kids Cipinang Muara Jakarta Timur* dan pandangannya dalam perspektif Islam. **Metode Penelitian:** Jenis penelitian ini adalah deskriptif dengan jumlah sampel 77 Ibu di BIMBA *Rainbow Kids Cipinang Muara Jakarta Timur*. **Hasil :** Hasil dari penelitian ini menunjukan bahwa mayoritas Ibu berperan aktif dalam membantu menyikat gigi anaknya setiap hari dengan presentase sebesar 83,1% **Kesimpulan :** Mayoritas Ibu (83,1%) sudah berperan aktif dalam melakukan penyikatan gigi anaknya sesuai dengan waktu dan cara yang tepat. Menurut perspektif Islam Perilaku Ibu menyikatkan gigi anaknya dengan baik dan benar sebagai upaya menegakkan *hifdz nafs* (melindungi jiwa) dan *hifdz nasl* (melindungi keturunan).

Kata kunci: Perilaku Ibu, Menyikat gigi anak, Anak usia 3-4 tahun, *Hifdz nafs*, *Hifdz nasl*.

ABSTRACT

Name. : Laras Fajri Nanda Widiiswa
Faculty : Bachelor Program of Dentistry
Judul : Mother's Behavior in Brushing Children's Teeth at BIMBA
Rainbow Kids Cipinang Muara East Jakarta

Background: Children aged 3-4 years are not yet able to optimally clean their teeth independently due to the incomplete development of fine motor skills in children aged 3-4 years. The results of RISKESDAS 2018 show that proper tooth brushing behavior for toddlers is still very low so that parents, especially mothers, must play an active role in helping brush their children's teeth every day to avoid tooth decay. **Objective:** Knowing the description of mother's behavior in brushing children's teeth at BIMBA Rainbow Kids Cipinang Muara East Jakarta and its views in an Islamic perspective.

Research Methods: This type of research is descriptive with a sample size of 77 mothers at BIMBA Rainbow Kids Cipinang Muara East Jakarta. **Results:** The results of this study indicate that the majority of mothers play an active role in helping brush their children's teeth every day with a percentage of 83.1% **Conclusion:** The majority of mothers (83.1%) have played an active role in brushing their children's teeth according to the right time and method. According to the Islamic perspective, the behavior of mothers brushing their children's teeth properly and correctly is an effort to uphold hifdz nafs (protecting the soul) and hifdz nasl (protecting offspring).

Keywords: Mother's behavior, Brushing children's teeth, Children aged 3-4 years,
